

## Partner Job Feed Help your students find their dream jobs.

Your career services job board is now connected to a new source of jobs and internships! The new "Partner Jobs" tab gives students the ability to search and filter pre-approved jobs from Monster<sup>®</sup>, ZipRecruiter<sup>®</sup> and College Recruiter.

This gives your students more opportunities to find their dream job, right within your career center software.

## Increase Student Engagement

Provides a single location for all job search activities within your career service platform.

Increase Employment Outcomes

All jobs are automatically filtered to only display college student appropriate and degree-required opportunities.

## Save Yourself Time

There is nothing our school admin users need to do once it's turned on.

## It's easy to get started

School admins can turn this new "Partner Jobs" feature on/off by navigating to Manage Permissions > Searches > Search Results > Job > Aggregate Partner Jobs within the CSO System admin portal. Once Partner Jobs are enabled, new jobs from Monster, ZipRecruiter and College Recruiter will automatically be included in this new "Partner Jobs" tab.
