

Career Network Registration

The GradLeaders Career Network gives your students another way to increase visibility to employers and land their dream job. This exclusive group of hand-picked partners work with us to offer co-registration right within your school's career services website.

WHY

- + Give your students secondary career resources to aid them in their job search.
- + Provide students with even more possibilities to virtually connect with employers beyond those that recruit on campus.
- + Improve employment outcomes by providing students with increased career pathway options available from an exclusive network of partners.

HOW

- 1 Contact your Customer Relationship Manager or our Customer Support Team at support@gradleaders.com to set up this feature.
2. GradLeaders will turn on Career Network Registration for all of your students.
3. Once set-up is complete, new students will be prompted to co-register after completing registration with your career center, or going to the main dashboard. Existing students will continue to receive prompts to co-register upon next login until they save their preferences.
