*The co-op module that GradLeaders offers is unmatched! It has been central to our ability to maintain a seamless workflow for our five different work-integrated learning programs. It's robust, but very easy to use, and the ability to customize it to our needs has been critical in an unparalleled way. It's allowed us to maintain our process without having to compromise. The integration with surveys is a key feature for us in streamlining our programs, and for providing a user-friendly experience for our students and employers. The amount of time and energy we save on a daily basis thanks to the record keeping abilities that the module offers is beyond measure, and we've saved time, money and storage space thanks to a paper-free process.*
