

## CAS Authentication

To configure CAS authentication in GLCC, we will simply need your school's CAS login, logout and ServiceValidate URLs. We need the following 3 variables from you. The most common form we receive is shown below with "XXXXXX" as the school name.

**CAS Login URL:** <https://auth.XXXXXX.edu/cas/login>

**CAS ServiceValidate URL:** <https://auth.XXXXXX.edu/cas/serviceValidate>

**CAS Logout URL:** <https://auth.XXXXXX.edu/cas/logout>

Our service name for our test site will identify itself as:

[https://migratecandidate.gradleaders.com/\[SCHOOLTENANT\]/SingleSignOn/CASNonAuth.aspx](https://migratecandidate.gradleaders.com/[SCHOOLTENANT]/SingleSignOn/CASNonAuth.aspx)

Our service name for our production site will identify itself as:

[https://candidate.gradleaders.com/\[SCHOOLTENANT\]/SingleSignOn/CASNonAuth.aspx](https://candidate.gradleaders.com/[SCHOOLTENANT]/SingleSignOn/CASNonAuth.aspx)

These are examples, please submit a request to our support team, [support@gradleaders.com](mailto:support@gradleaders.com) for the specific url for your school.

Please be sure to add both of our service names to ensure a smooth transition when you go from our test site into our production site. Along with your CAS URLs, can you also provide us with the credentials of a test user that can be authenticated so that we can confirm a successful authentication once CAS has been configured? We will need the username, email address and the password of that test user.
