

nSpire AI for Education

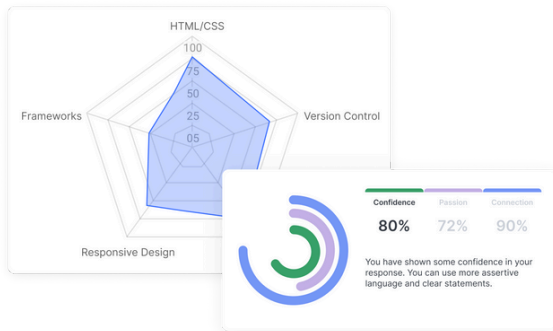

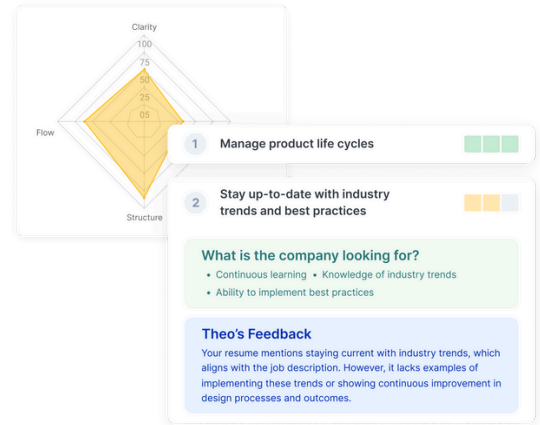

nSpire AI brings actionable intelligence to higher education institutes, job-seekers, and employers

We use AI to help career development teams boost placement rates, and enable counselors to focus on high impact work. Let AI take care of routine job preparations, personalize resume feedback, and conduct mock interviews, **for all students, anywhere, anytime.**

Empower students. Boost placement rates.

With nSpire AI, students can:

- Identify top jobs that match with their profiles, and get personalized resume feedback to enhance their chances of getting shortlisted
- Practice interviews with questions tailored to specific opportunities, and get instant, dynamic coaching on soft skills, storytelling, content, and delivery
- Share their pitches and interview answers with peers, mentors, and counselors for feedback

Enhance counselor productivity.

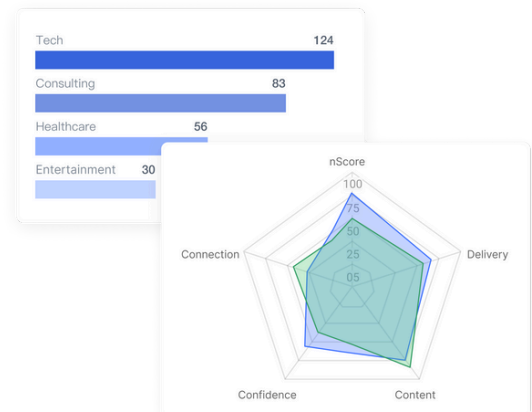

With nSpire AI, counselors can:

- Maximize appointment efficiency with pre-appointment resume and interview videos. Spend appointment time working on bigger challenges, and providing high-value guidance.
- Share learning and development content with students through the portal

Comprehensive Career services.

With nSpire AI, career services teams can:

- Comprehensively serve all students in their preparedness efforts
- Get real-time student insights to identify skill gaps, and make informed decisions to boost placement rates
- Support budding entrepreneurs with nSpire's entrepreneur product that uses AI to work through business plans
